

## DEVONSHIRE NEWS

Welcome to the 1st Edition of "Devonshire News"; a regular update for local clinicians on the services and developments at our practice. Our aim is to support our fellow practitioners in providing solutions for your patients in every speciality. We welcome and encourage your involvement at every opportunity.

### About us

Devonshire House has been a wholly private practice since 1904 and our aim, as it was originally, is to provide the highest quality dental care based upon sound scientific evidence and principles.

We offer a full range of specialist dental services including Implantology, Periodontology, Endodontics, Orthodontics and CT Scanning, benefiting both our regular Devonshire House patients and clients referred to us by Dental Colleagues for specific work. In addition, we offer routine and maintenance care for all age groups.

We are committed to maintaining the highest standards in every aspect of our Practice with regular training and high quality support services.

### Our Reception Team

Our reception team aim to deliver superb customer service through their friendly approach. Claire heads the team of seven receptionists and has primary responsibility for co-ordinating patient appointments, liaising with referring dentists and providing an outstanding experience for our patients.

Claire has recently completed a certificate in Business Management and plans to use her knowledge to make improvements in her department.

### Quarterly Dentist focus Nick Williams

Nick qualified from Guy's Hospital in 2000 and completed his Specialist training in fixed and removable prosthodontics at the Eastman Dental Institute and is a GDC registered Specialist.

He continues his links with the Eastman Dental Hospital in London, working in the department of Postgraduate Specialist Prosthodontics and Restorative Dentistry.

# Cambridge Private Dentistry Forum

## CPD at Devonshire House

Devonshire House hosts regular CPD meetings for local dental professionals with an interest in discussing clinical topics with an open format. Each seminar aims to present an update in contemporary practice in a particular area of dentistry and comprises two hours free of charge verifiable CPD.

These evenings are hosted by the partners and clinicians, Kevin Esplin, Julian Martin, Ian Pearson, Wail Girgis, Cyrus Nikkhah and Nick Williams.

For more information, contact [suzy.blumsom@devonshirehousedental.co.uk](mailto:suzy.blumsom@devonshirehousedental.co.uk)

## Devonshire "Restorative 10"

Now in its 2nd year, Devonshire 10 is a new study group aimed at helping referring practitioners to incorporate dental implants into their own practices, by providing training on a wide range of topics; from assessment and treatment planning, to taking impressions and bonding of the final restoration. This unique and complimentary training and mentoring opportunity is offered to 10 colleagues each year.

For more information please contact Heidi Jeremy on 07736 924 065.

## What's New?

### Our Plans for the future: Our laboratory

Our on-site dental laboratory provides an excellent standard of support to our dentists. We are currently building a new, larger, state-of-the-art laboratory at Copley Hill, just south of Cambridge. This exciting development will allow us to increase our team of technicians and benefit our patients with custom-made devices conveniently manufactured to our exact specification.

### Introducing Guided Surgery

We are delighted to offer you a CT scanning service using our Gendex GXCB500 Cone Beam Scanner unit at Devonshire House. The scan data can be exported in to our i-CAT viewer software or as raw DICOM files formatted for SimPlant and NobelGuide.

Additionally, we offer a service providing full formatting and 3D modelling of data for use in SimPlant Planner, SimPlant One Shot and SimPlant Viewer platforms through IDT Ltd.

Please feel free to contact our reception team for further information or if you have any enquiries.
